UI/UX & Web

My name is M. Adi Syahputra, a student of Lambung Mangkurat University, Information Technology Study Program. Since semester 2, I have had an interest in UI/UX and Web Development. To support this interest, I joined the Independent Study program at Infinite Learning with a focus on UI/UX & Web Development.
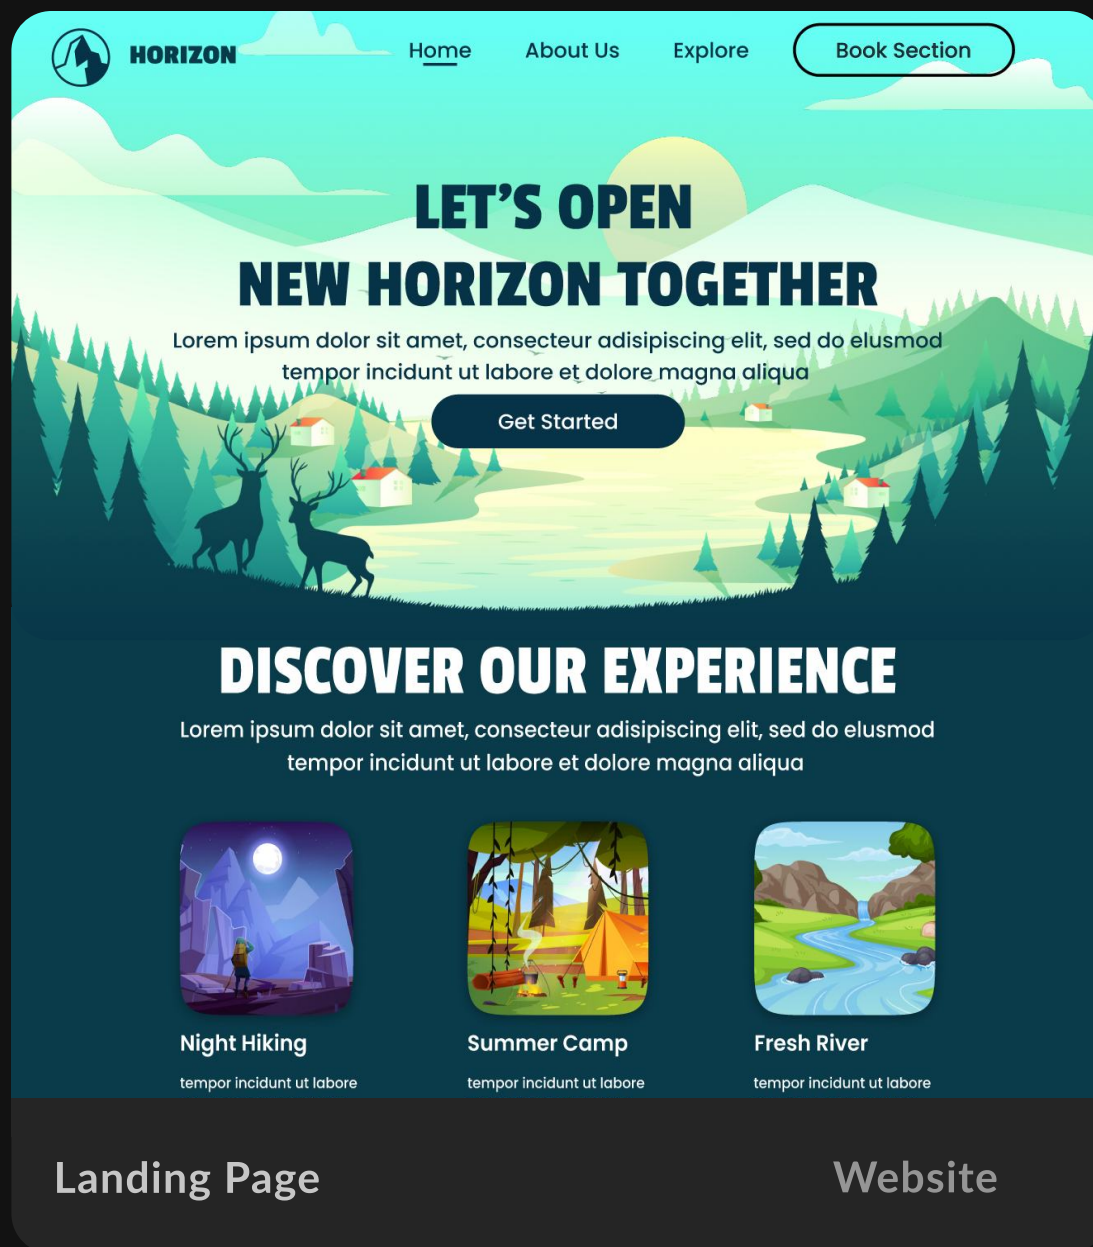

I have created several designs, such as home view for URL Shortener website, home view for Face ID Identification website, and C19 mobile application design that includes splashscreen, on boarding, sign in, sign up, home, and others. In the future, I plan to create more designs and websites to hone my skills as a reliable UI/UX Designer and Web Developer.
